

The North East extents of the map will be coincident with the top right corner trim lines (for this example these are 19°57', 150°05').
The north-south line that runs through the centre of the graticule should be aligned vertically on the sheet.

Map Reliability
Topographic information checked from 2003 satellite imagery, and supplemented using other sources (1992-2002).
This map was not field checked and some information may not be accurate.

About the NATMAP Series
Geoscience Australia produces over 500 maps at 1:250 000 scale in the NATMAP series which covers Australia. They are used by professional and recreational users and are available both flat and folded. A corresponding data product, GEODATA TOPO-250K, is also available.

Your Feedback is Welcome
If you discover errors or omissions on the map, please let us know via the map amendment page on our web site or send your annotated map to us. We will replace your map with the corresponding current edition. We value your assistance for the next edition. e-mail: mapfeedback@ga.gov.au

Acknowledgments
Geoscience Australia gratefully acknowledges contributions to map content. Information is supplied by the Australian Government, State and local governments, private sector agencies and individuals. A comprehensive list is available from our web site.

About this Map
Projection: Map Grid of Australia 1994 (MGA84)
Universal Transverse Mercator on GRS80 ellipsoid
Horizontal Datum: Geocentric Datum of Australia 1994 (GDA94)
Equivalent to WGS84
Vertical Datum: Australian Height Datum (AHD)
Horizontal Accuracy: ± 50 metres
Vertical Accuracy: ± 25 metres
Elevations in metres; 50 metre contour interval

Blue North (TN), Grid North (GN) and Magnetic North (MN) are shown diagrammatically for the centre of the map

MN is correct for 2002 and moves westerly by 0.1° in about 4 years

How to Quote a Grid Reference for a Particular Point
Blue numbers on the map grid lines are 10 000 metre intervals

- Quote the map grid reference
- Read letters identifying 100 000 metre square containing the point
- Locate the vertical grid line to the left of the point and read large number on the grid line
- Estimate tenths from the grid line to the point
- Locate the horizontal grid line below the point and read large number on the grid line
- Estimate tenths from the grid line to the point

Thus the reference for *Aurora* is: Proserpine FT8720

Climatic Graph

Legend

- Principal road: Locality; Bull-rup area
- Secondary road: Bridge; Causeway
- Minor road: Access & condition not assessed
- Vehicle track: Access & condition not assessed
- Route marker: National, State
- Gate: Stock grid
- Embankment; Cutting
- Landing ground; Airport; Helipoint
- Multiple track railway; Station or siding
- Single track railway; Bridge; Tunnel
- Powerline (110 kV and over)
- Homesite; Building; Ruin
- Chimney; Silo; Tower
- Fence; Levee; Open cut mine
- Mine; Windpump; Yard
- Contour with value; Depression contour
- Horizontal control point; Spot elevation
- Sand; Sand dunes
- Sand ridge; Peninsula; Cliff
- Forest; wood or shrub land; Rainforest
- Plantation; Urban recreation parkland
- Orchard or vineyard; Windbreak
- Bore or well; Spring; Tank or small dam
- Watercourse (presence of water not mapped)
- Subject to inundation; Swamp
- Lake; Perennial; Non-perennial; Waterhole
- Wreck; Submerged; bare or washed
- Foreshore flat; Lighthouse
- Shoal; Tidal ledge or reef; Mangrove
- Rock; Submerged; bare or washed; Breakwater
- Jetty or pier; Wharf; Saline coastal flat
- State or Territory border
- Reserved area boundary
- Prohibited area boundary

Colours are printed representations (actual map printing colours may be different than shown here).
